

Chapter 1 Review Assignment

Overview

In this assignment, you will review the material covered in chapter 1 of Automate the Boring Stuff.

Objectives

- Review use of `input()`.
- Review use of conversion functions, specifically `int()`.
- Review the assignment of function returns to variables.
- Review arithmetic operators in Python.
- Review the use of `print()` with formatted strings.
- To continue practicing the use of functions from Week 3.

Requirements

- Only modify the program where instructed via `TODO` comments. I have provided the template program with pre-defined functions. You must call these functions in the specified locations.
- Submit your assignment to Gradescope and ensure you pass all auto-grader tests.
